

PROTECTING INNOVATION FROM INSIDER THREATS

Security Threats to Pharmaceuticals and Biotech

The top concern for Pharmaceuticals and Biotech is patient safety, but the top security concern is protecting innovation. Global health challenges put pharmaceuticals and biotech at the center of not only corporate espionage but nation state threats. Financial gains may lure even the most loyal of employees. The increasingly collaborative nature of research also adds to the complexity of protecting against Insider Threats.

Data Behavior Analytics (DaBA) detects Insider Threats

Cyberhaven's new approach protects business critical data. Our Data Behavior Analytics (DaBA) solution monitors all data movement and user interactions, across on-premise and cloud environments. It immediately detects both the careless and malicious mishandling of sensitive data.

Key Benefits

Easily Monitor Sensitive Data and User Interactions

Immediately Detect the Mishandling of Sensitive Data

Quickly Identify Risky Employees

Rapidly Resolve Risk Exposure

DaBA reveals the complete Data Journey

Continuous Data and User Monitoring

Focus on interaction with important data

Follow all data everywhere despite data sprawl and shadow IT

Reduce risk with real-time response

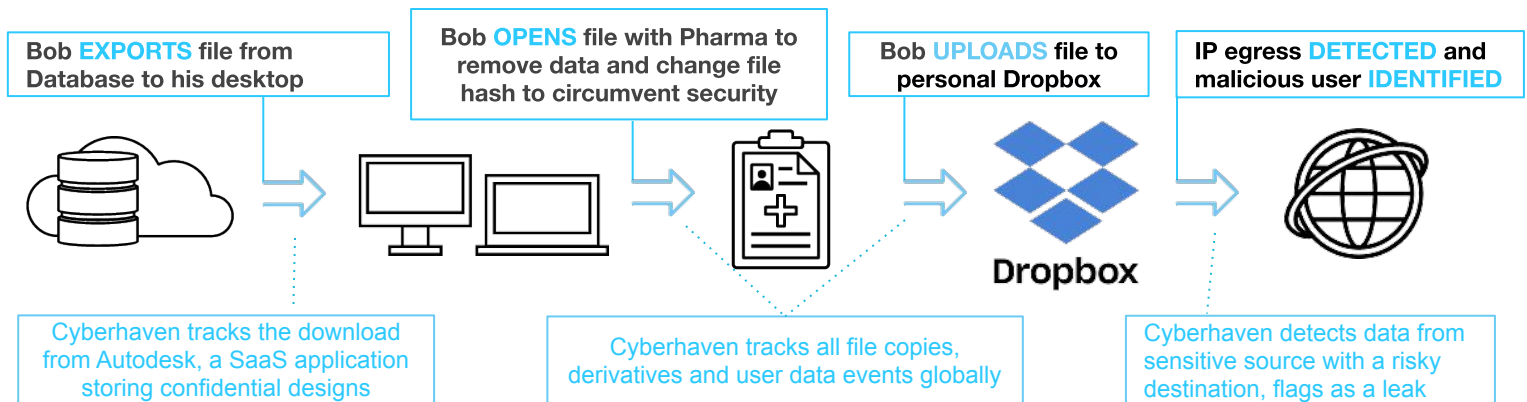

DaBA: MONITOR DATA & USERS

CYBERHAVEN

Data Behavior Analytics (DABA) in action: monitors the complete data journey including all user interactions to immediately reveal potential careless or malicious insider threats.

Sensors **trace** data flows and **journal** all file activities including:

- Creation, upload, download, open, modify, move and copy
- Export of data and reports from databases and applications
- Cutting / pasting of content from emails, files and documents
- Receipt of emails, files and documents

- ◆ Delivers immediate visibility by tracing all data activity automatically, across all data silos (including endpoints, databases, email and an ever growing number of cloud SaaS applications).
- ◆ Creates a complete contextual journal of how each piece of sensitive data was accessed and exposed.
- ◆ Reveals the data journey of sensitive data highlighting surprising destinations.

- ◆ Tracks data behavior across all environments as data travels to and from cloud apps for insights into sources of risk.
- ◆ Monitors sensitive business transactions within cloud-based applications and platforms like **Office 365, SharePoint, and Salesforce**.
- ◆ Easy and rapid deployment of sensors gives immediate visibility.
